

PeopleSoft Finance/Supply Chain Upgrade Scheduled for May 22-25

PeopleSoft Finance/Supply Chain modules are scheduled for an upgrade over the Memorial Day holiday weekend. The University of Missouri has been on the current 9.0 version since December 1, 2008 and will be upgrading to version 9.2.

The Project Team and Finance/Supply Chain functional groups at the University have been reviewing new features and software enhancements that can improve business processes in the new version. Training materials are being updated and information sessions are planned to explain any changes to Finance and Supply Chain procedures and to introduce new features that are being deployed. To view a New Features Document for what will be available in version 9.2, click [here](#).

Additional information about the upgrade, outages, information sessions, training material availability, and much more will be communicated during the next 6 weeks as we count down to the upgrade weekend.
